Buffer Stops	29 Sep 17

Canberra Business Chamber (CBC) is working closely with the ACT Government's Transport Canberra to build links between Government, the local business community, and Canberra Metro. Acting as a conduit between stakeholder groups, CBC will ensure opportunities for local business are maximised and any concerns are communicated.

CBC encourages all businesses to be "project ready", to take advantage of this significant infrastructure investment by ensuring they have appropriate skills to participate where possible. Specific training opportunities and information sessions are available.

Throughout this process, the Chamber will be working proactively to mitigate impacts to business along the light rail corridor through ongoing communications, industry collaboration and business support programs.

With a clear and dedicated focus on new business development and growth, the additional aspect of the project is to identify, and cultivate, new business opportunities as a result of the Light Rail project.
